Profile

B.Sc. Computer Science graduate and certified AI/ML specialist with skills in Python, Java, C++, Machine Learning, and Data Science. Proven ability to develop predictive models and web applications.Experienced in testing and validating web application projects, identifying defects, and improving functionality. Seeking an opportunity as a Junior Test Engineer to contribute to software quality and reliability while continuously developing my testing and quality assurance skills.

Education

2023 – 2026
Kerala, India

Bachelors in Computer Science
Mahatma Gandhi University
CGPA: 6.32 / 10

2021 – 2023
Kerala, India

Higher Secondary Education in Computer Science
HSS Thiruvampady
Scored 85%

Projects

2025 – 2026

Last Serve: Food Waste Management & Home Kitchen Empowerment

- Tech Stack: Python, Django, SQLite/MySQL, HTML/CSS.
- Developed a full-stack web application using Python and Django to bridge the gap between food surplus (hotels/home kitchens) and local demand.
- Designed a Dynamic Discounting system and a Self-Pickup model to provide affordable food options while eliminating delivery overhead.
- Performed manual testing of developed web applications, created test scenarios, identified defects, and verified fixes to ensure application quality and functionality.

2024

Peer Learning Matchmaker – Collaborative Academic Platform

- Tech Stack: PHP, MySQL, HTML/CSS, JavaScript, Google Meet API.
- Developed a web-based application designed to foster peer-to-peer academic support by intelligently matching students based on their strengths and learning needs.
- Integrated a Smart Matchmaking Engine that connects students who wish to teach a specific subject with those seeking help in that same area.
- Implemented a Quiz Management Module that allows mentors to create assessments, enabling learners to evaluate their progress through peer-created content.
- Facilitated seamless virtual collaboration by integrating Google Meet, allowing students to schedule and conduct live study sessions directly through the platform.

Skills

Testing & QA
Manual Testing, Functional Testing, Regression Testing, Bug Reporting, SDLC & STLC

Programming Languages & Libraries
Python, C++, Java, PHP, JavaScript, SQL,Pandas, NumPy, Scikit-learn, Matplotlib.

Technologies & Software
Computer Vision, Machine Learning, Predictive Modeling, MySQL, VS Code, Microsoft Office 365.
